## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments with respect to claim have been considered but are moot in view of the new ground(s) of rejection.

A person shall be entitled to a patent unless -

- (b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Mammano et al. (U.S. patent #,5,422,562).

Mammano et al. discloses claimed invention (figures 1-7), including a switched power supply converter for broad range of input voltages (column 9, lines 1-70 and claims 1-9).

Art Unit: 2838

4. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Hwang (U.S. patent # 5,565,761).

Hwang discloses claimed invention a switched power supply converter for broad range of input voltages (figures 11-14 and column 5, line 15-50 also claims 1-10).

5. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Cuk et al. (U.S. patent # 5,815,380) or Summer (U.S. Patent # 5,282,122).

Cuk et al. Discloses claimed invention a switched power supply converter (figure 16) for broad range of input voltages that comprises a first stage which converts a first voltage supplied from a voltage source in to a second voltage by means of a first switching element (figure 1, item Q) and a second stage that receives the second voltage and transforms it into a third DC voltage, a first control circuit controls the duty cycle of the first switching element so that the duty cycle varies between a first limit of the duty cycle and a second limit of the duty cycle; further the first control circuit is adapted to fix duty cycle (column 8, line 10-40) at the first limit of the duty cycle or at the second limit of the duty cycle in the event that the first voltage is outside a predetermined range of voltage values (column 3, line 10-70)...

In regards to claims 2-7, Cuk et al. also discloses claimed limitation such as galvanic and non galvanic isolation (column 1, lines 30-70), a transformer (column 5, line 5-10), first control circuit and second control circuit (column 11, line 50-65). Similarly Summer's figure 1, discloses claimed subject matters.

Art Unit: 2838

6. Claims 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Brown et al. (U.S. patent # 5,483,436)) or Huykman (U.S. Patent # 5,394,076).
